

Preliminary Amendment
Divisional Application of U.S. Application No. 09/660,522

REMARKS

Entry and consideration of this Amendment are respectfully requested.

The only difference between the substitute specification submitted herewith and that which was required to be filed in the parent application Serial No. 09/660,522 and which was entered is that the word "myocardia" at page 10, line 7 of the original English application has not been changed. No new matter is added to the substitute specification.

The amendment to the specification corrects a mistranslation of the PCT application. A declaration of a translator explaining the mistranslation will be filed within the next few months.

Claim 12 is supported in the specification at page 9, line 20, page 10, line 14 and Example 8. Claim 13 is supported in the specification at page 8, lines 18-24, and Claim 14 is supported in the specification at page 11, line 1 - page 12, line 17.

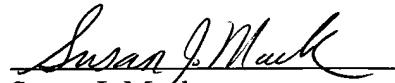

Entry and consideration of this Amendment are requested, respectfully.

Accordingly, no question of new matter arises and entry and consideration of this Amendment are requested, respectfully.

Preliminary Amendment
Divisional Application of U.S. Application No. 09/660,522

Accordingly, entry of the substitute specification is requested, respectfully.

Respectfully submitted,

Susan J. Mack
